

CASE STUDY

COMPANY NAME

Ryvers School

Ryvers School is a thriving, diverse primary school for children aged 3-11 years. Based in Slough, Berkshire, UK. Currently it has approximately 650 students and growing. Their vision is to be an outstanding school with high aspirations that includes technology. They have technology in over 23 classrooms and open spaces.

KEY CHALLENGES

- No central network management system in place
- 1:1 deployment deadline required rapid implementation
- Ownership of solution
- Find economical WiFi solution
- Increase WLAN security

ABOUT REDWAY NETWORKS

Redway Networks are specialists in networking and wireless solutions within the education sector. Our experienced team offer full site surveys, wireless network planning and installation as well as providing ongoing support with your wireless network.

THE SOLUTION

Ryvers School chose to implement the AP130, which is for ultra-high density environments, powerful enough to provide all the services needed for an enterprise network, and inexpensive enough to deploy for ultra-high capacity networks. The AP130 combines 2x2, 2-stream, 802.11ac WiFi technology and advanced security and device lifecycle management together into a cost-optimised solution that allows you to deploy high speed WiFi into every classroom. Along with Hive Manager Online for cloud-based network management.

26 AP130's were deployed in a quick timescale across the school's three sites and two modular buildings.

"Aerohive Wireless works seamlessly and having visibility of the data via the HiveManager NG portal is a real bonus. The service provided by Redway Networks throughout the implementation was impeccable" says Maria Lee, Ryvers School.

"Ryvers Primary School came to Redway Networks with a requirement to replace their legacy wireless infrastructure. The Redway team were very committed from the initial engagement and ensured they walked the school through every stage of the project from the survey, proposal and deployment. Once completed we had great pleasure in receiving the thumbs up to say the solution was a huge success, we also took satisfaction in knowing the school's wireless needs have been future-proofed for many years" Leigh Hayes, Redway Networks Sales Director.

RESULTS

- Robust cloud-enabled enterprise WiFi seamlessly deployed across school
- Controller-less architecture mitigates risk and single point-of-failures
- Ownership of solution
- Using Hive Manager for centralised WiFi network management

"The service provided by Redway Networks throughout the implementation was impeccable"

Maria Lee, Ryvers School
