

EDUCATION CLOUD-NETWORKING

Wireless & Networking.
Made Simple.

Smart cloud-networking and security solutions

With digital transformation and the huge shift to smart schools, the need for a robust, easily managed IT infrastructure has never been more important for improving the student experience and delivering a safe learning environment.

At Redway Networks, we are experts in the design and installation of enterprise cloud-networking solutions that improve efficiency, security and data capacity. Our next-generation wireless networks are future-proofed and scalable, enabling you to securely connect to an unlimited amount of devices from anywhere on campus.

We've designed and delivered hundreds of successful projects that are providing our education customers with secure, robust networks that are enhancing the student experience and opening up more ICT learning possibilities both in and out of the classroom.

Partner

Premier Integrator

Superior network performance for your school

At Redway Networks, we are wired and wireless networking experts with extensive experience in the education sector.

We believe in finding an enterprise, cloud networking and security solution that delivers robust connectivity, coverage, capacity and security. Our team of certified network engineers will review your goals and recommend the best fit enterprise products for delivering a resilient, future-proofed network.

We are Cisco Premier Partners with experience in providing Meraki's comprehensive suite of solutions including an intuitive cloud-dashboard, indoor and outdoor WiFi access points, cloud-managed network switches, firewalls, cyber security, IoT sensors and smart cameras.

A Meraki solution designed by our experts will future proof your network and provide optimum performance, security and longevity for your schools.

High-quality wireless networks

We know that a successful wireless installation is more than just robust, enterprise access points.

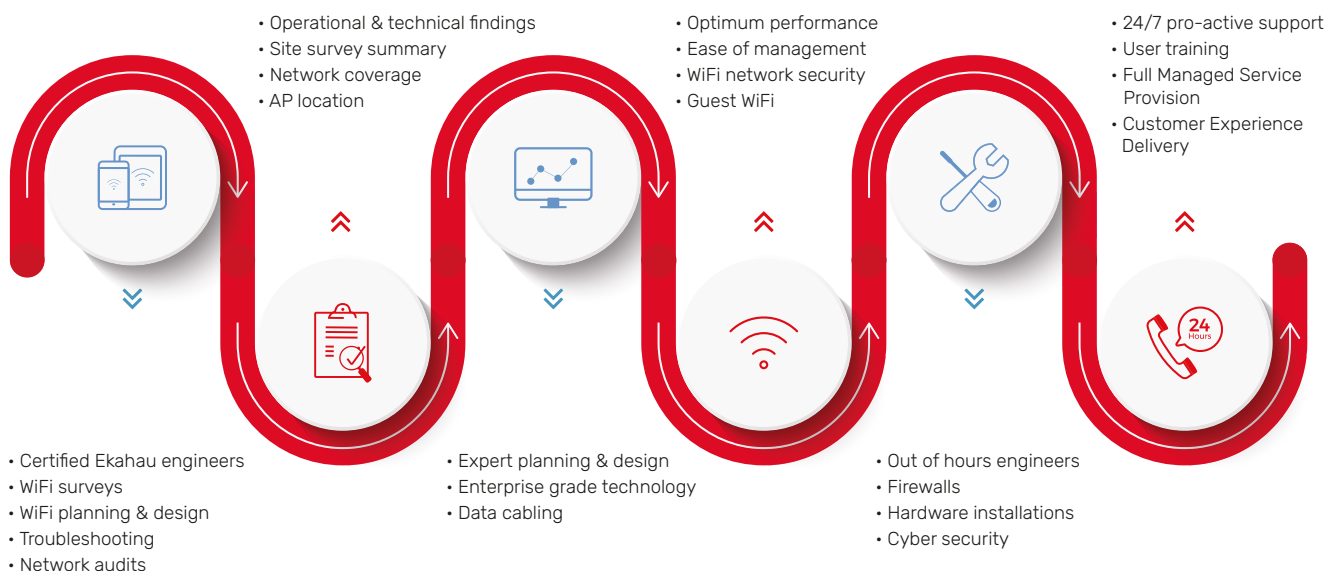

All our network engineers are Ekahau Certified and have the expertise to design a future-proofed and responsive solution so you gain optimum performance from your network. We provide a range of Ekahau surveys including WiFi troubleshooting, fault-finding, design reports and post installation.

Centralised cloud-management

Cloud-networking makes it easier for schools to create seamless, sustainable, secure, connected experiences for all their students. Centralised IT delivers governance and creates cost-effective efficiency for multi-academy trusts whilst giving teachers and students seamless connectivity.

That's why we recommend Cisco Meraki's cloud-first platform for managing your entire distributed network infrastructure from a single dashboard.

The Redway Networks' Experience

Our solutions are delivering exceptional results for our customers:

"Our Meraki WiFi has been a huge game changer for us as its improved teaching and learning by enabling us to provide a much better ICT provision. Redway Networks delivered an outstanding service and we're continuing to see benefits from Meraki but the standout one for me is being able to 'do more with less'."

Emily Stigant, IT Manager, The Forest of Dean Trust

"From a staff point of view Meraki has improved productivity and from a student point of view enabled us to really explore how we work with educational technology."

Tom Henesey, Headteacher, Drybrook Primary School

"Meraki's single, secure platform has been a game changer for us. Data quality and security has improved, and we now have complete visibility of our schools from one intuitive, easy-to-use dashboard. Redway Networks' designed Meraki solution has enabled us to raise IT priorities even higher."

Ross Weeks, Head of IT & Digital Transformation, Anthem Schools Trust

"We now have significantly better network coverage with much faster WiFi. Redway Networks has been knowledgeable throughout the whole project and the service we have received has been exceptional. From the initial conversation, through to the product recommendations, design period, implementation and final survey - everything was spot on."

Chris Baker, IT Manager, John Warner School

"I really liked the Meraki product and as it is 'under one basket' I knew Meraki would deliver a great insight into our network with scalable, cross platform visibility."

Tony Eden, IT Manager, Brighton Hill Community College

"Our Meraki WiFi supports one-to-one learning and access to the digital curriculum. Redway Networks was fantastic to work with."

Simon Cunningham, IT Manager, Wakefield Grammar School Foundation
