

WAREHOUSE WiFi

Wireless Solutions.
Made Simple.

Proven wireless solutions for warehousing and logistics

With the digital revolution having far reaching implications for the B2B supply chain, the need for a fast, reliable wireless network has never been more important for supporting the needs of a modern, automated warehouse.

At **Redway Networks**, we are experts in the design and installation of wireless solutions that improve warehouse efficiency by providing 'wired like' performance with superior, secure coverage and fast, stable connections to even the smallest of devices.

Our bespoke wireless solutions support a plethora of warehousing technology and enable your business to improve its service capabilities and gain a competitive edge.

Whatever the size or type of your facility, we can provide a robust wireless infrastructure that seamlessly connects all your internet-based devices and systems so your business can meet the needs of an on-demand supply chain.

We provide private cloud and on-premise options and we only endorse world-leading wireless technology that is optimised for scalability, zero-touch provisioning, and simplified operations to ensure your warehouse facility gets optimum connectivity and a secure WiFi signal that never loses connection in the warehouse or outside.

High performing warehouse WiFi made simple

At **Redway Networks**, we are independent wireless experts who have extensive experience within the warehousing and logistics sector. We believe in finding a partner and platform that fits your exact warehouse facility needs and will deliver ultimate connectivity, coverage, and reliability. Our team of network experts will recommend the best wireless solution for your business and guide you through the complete process so you have an affordable, resilient solution that will support your future network capacity for the next 8-10 years.

We partner with industry-leading brands and invest in software at the forefront of wireless technology, so you get a

hyper-reliable solution that delivers exceptional performance and simplifies every aspect of your digital operations. Our WiFi networks guarantee warehouse coverage to a pre-defined signal level to ensure even the smallest of devices have fast, stable connections and provide unified communications between staff, stock, and logistics.

Brands

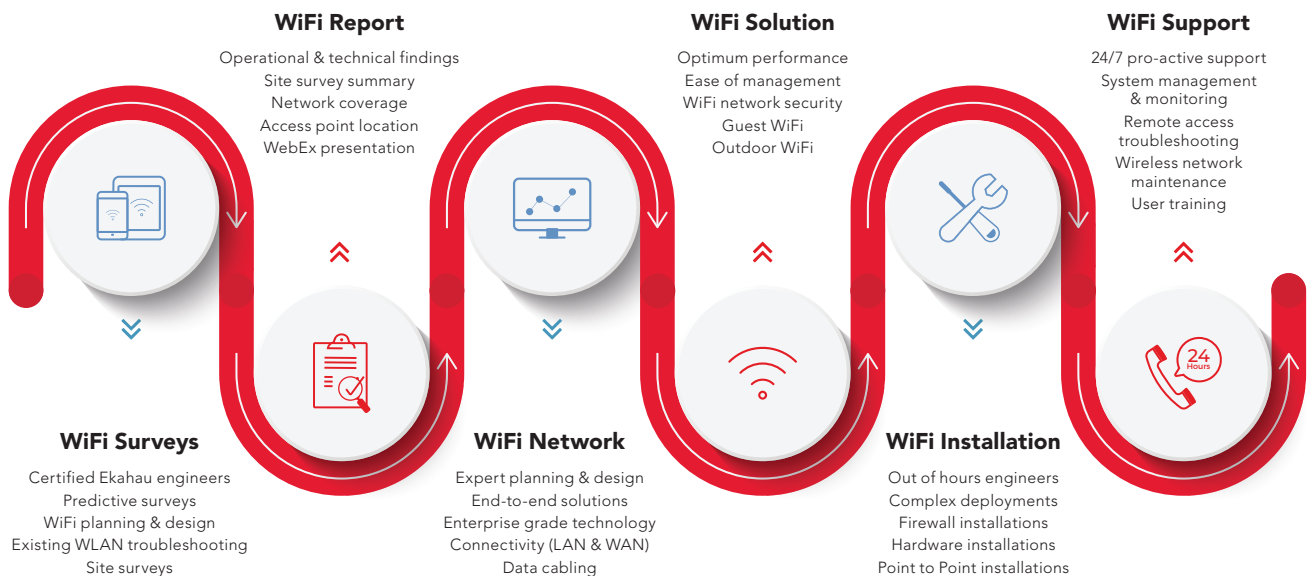

- Aruba (HPE)
- Fortinet
- Cambium Networks
- Meraki (Cisco)
- Ekahau
- Ruckus
- Extreme Networks

In addition, we partner with Zebra technologies and can provide the most competitive prices on Zebra warehouse solutions including RFID handheld, vehicle mount and wearable computers.

Modern, secure WiFi for the connected warehouse

We know that a successful wireless installation is more than just robust access points which is why all our engineers are Ekahau Certified and have the knowledge and expertise to deliver a right first-time initial design, which is presented through Ekahau Live to see the real-time impact of your new configuration. We are also experts in greenfield projects and can work around construction issues including 'off plan' design using theoretical heat mapping and post construction surveys. On your go-live date, our engineers won't leave your warehouse facility until your network is thoroughly tested and supports your user needs.

- Wireless troubleshooting and heat mapping
- Ekahau design report
- Bespoke network design
- Post installation surveys
- Indoor & outdoor connectivity
- Advanced network security
- Next-generation WiFi that supports AI-driven software & hardware, mobile computing, handheld devices & internet-enabled forklifts
- Monitoring strategies
- 24/7 support and maintenance
- On-premise or cloud-based central management tools

We are experts in warehouse WiFi and make even the most complex installations simple. We believe in a right first-time approach to your deployment – from initial survey through to post-installation support – so your WiFi brings a healthy ROI for your business.

At Redway Networks, we are 100% client recommended and our WiFi is a future-proofed investment for your warehouse and distribution business.

“We have been extremely impressed with our WiFi solution from Redway Networks and have seen a massive improvement in business efficiency and productivity as well as a reduction in costs as we’ve eliminated the need to employ additional staff. Redway provided us with assistance every step of the way and everything that was promised was achieved and delivered.”

WF Education Group

“We needed a wireless provider who was flexible and could work around construction issues, including project delays and who could also anticipate from the offset how the installation of the warehouse racks and electronics would impact the performance of the new WiFi once it was operational. A real ‘pain point’ for us in the initial stages was how well the WiFi would cope with our automated systems once the warehouse was up and running but Redway recognised this and proved they had the experience to get the foundations right from the start. Redway Networks delivered on every front and we now have a modern, robust, secure wireless network solution capable of supporting our business operations both now and in the future.”
